

Black Rock Mining Appoints Chief Commercial Officer

HIGHLIGHTS

- Mr Greg Wheeler has been appointed Chief Commercial Officer
- Mr Wheeler's extensive financial and commercial experience is expected to bolster the Black Rock team's skills in marketing, logistics and commercial negotiations
- Mr Wheeler's previous roles were at PwC, ship manufacturer Austal and global trading and shipping player Wellard Group Holdings

Tanzanian graphite developer Black Rock Mining Limited (ASX:BKT) (**Black Rock** or the **Company**) is pleased to announce the appointment of Greg Wheeler as Chief Commercial Officer, effective 28 March 2022.

Commenting on the appointment, Black Rock MD and CEO, John de Vries said:

"We are very pleased to be welcoming Greg to the Black Rock team. Greg's deep experience in commercial negotiations, global logistics and marketing represents a valuable addition to our team as we move towards finalising the project debt for the Mahenge Graphite Project by mid CY22 followed by construction in Q3 CY22."

Mr Wheeler started his career within PwC before spending 10 years with ship manufacturer Austal, where he was ultimately responsible for managing a team of more than 50 people. Mr Wheeler subsequently joined privately owned global trading and shipping player Wellard during a period of significant growth (including public listing) and responding to challenging market conditions, whilst building robust financial systems and processes.

Mr Wheeler's initial focus will be on product marketing and logistics as well as assisting with commercial negotiations with key third parties and stakeholders and supporting the construction of the Mahenge Graphite Project through contract execution.

ASX release was authorised on behalf of the Black Rock Board by: John de Vries, Managing Director & CEO

About Black Rock

Black Rock Mining Limited is an Australian based company listed on the Australian Securities Exchange (ASX:BKT). The Company has a 100% interest in the Mahenge Graphite Project (**Project**) located in Tanzania. The Project has a JORC compliant Mineral Resource Estimate of 213m tonnes at 7.8% TGC. It also has Ore Reserves of 70.5m tonnes at 8.5% TGC. The Ore Reserves support a mine life of up to 340k tonnes of graphite per annum for a reserve life of 16 years. Since the release of the Mineral Resource Estimate, the Company confirms that it is not aware of any new information or data that materially affects the mineral resources estimate.

On 25 July 2019, the Company released an enhanced Definitive Feasibility Study (eDFS) for the Project. The eDFS for the Mahenge Graphite Mine envisages a four phase operation, ultimately producing 340,000 tpa of high-grade graphite, with exceptional financial metrics including:

- *Low Capex*: Lowest peak capital expenditure of US\$116M for phase one*;
- *High Margin*: AISC margin of 63.1%;
- *Low Technical Risk*: Substantial pilot plant operations run of 110 tonnes; and
- *Superior Economics*: IRR of 44.8% with NPV₁₀ of US\$1.16bn (A\$1.65bn**)

Black Rock has obtained all Environmental approvals, Mining Licences and its Resettlement Action Plan with clear title to the eDFS project area. An FCI Agreement was signed with the Government of Tanzania in December 2021.

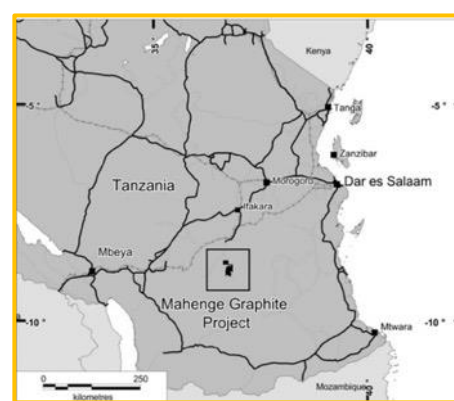

In June 2020, the Company announced a Strategic Alliance with POSCO Group for the development of the Mahenge Graphite Mine. This included an equity investment of US\$7.5M, signed in February 2021. In December 2021, a Term Sheet was agreed with POSCO for a US\$10M prepay and life of mine fines offtake for Module 1. Black Rock has also allocated planned production through Pricing Framework Agreements (ASX release 8 May 2019) with five other offtake customers.

Following release of the enhanced DFS (eDFS) in July 2019, the Company confirms that it is not aware of any new data or information that materially affects the results of the eDFS and that all material assumptions and, in the case of estimates of Mineral Resources or Ore Reserves, technical parameters underpinning the estimates in the relevant market announcements continue to apply and have not materially changed.

The estimated Ore Reserves and Mineral Resources underpinning the production target has been prepared by competent persons in accordance with the requirements in Appendix 5A (JORC Code).

The Company is construction-ready subject to financing.

JORC Compliant Mineral Resource Estimate and Ore Reserve***			
Ore Reserves	Tonnes (Mt)	Grade (% TGC)	Contained Graphite (Mt)
- Proven	-	-	-
- Probable	70.5	8.5	6.0
